CAREER OBJECTIVE

Final-year Information Technology student seeking an internship opportunity in **Software Development**, **Database Administration** or **IT Support**. Looking to apply my technical skills, communication skills and practical experience while contributing to real-world projects and working effectively with clients and teams.

WORK EXPERIENCE

SOFTWARE DEVELOPER

Jan 2023 – Present

Freelance Services, Remote

- Developed **custom software solutions** for local businesses, including barbershops and restaurants.
- Handled **software development, testing and system improvements** based on project needs.
- **Communicated with clients** to discuss project requirements, progress and suitable solutions.

IT SOLUTIONS INTERNSHIP

Jan 2023 – June 2023

Safis Solutions Sdn. Bhd, Georgetown, Penang

- Prepared **15+ IT solution quotations** for government and corporate tenders, achieving an **80% approval rate**.
- **Researched IT products** and solutions to identify suitable options based on client needs.
- Assisted with **hands-on technical work**, including PC repairs, IT equipment installation and setup at client locations.

EDUCATION LEVEL

BACHELOR OF INFORMATION TECHNOLOGY (HONS.)

Apr 2024 – Present

Universiti Teknologi MARA, Arau, Perlis

- **CGPA:** 3.89 / 4.00
- **Dean's List:** All semesters

DIPLOMA IN INFORMATION TECHNOLOGY (DIGITAL TECHNOLOGY)

Graduated Sept 2023

Politeknik Balik Pulau, Balik Pulau, Penang

- **CGPA:** 3.95 / 4.00
- **Dean's List:** All semesters
- **Top Student:** 2023 Batch

PROJECTS

AN ADAPTIVE 2D SIMULATION GAME FOR PHISHING AWARENESS

2026

Final Year Project · Unity, C#, MySQL

Developed a **PC-based 2D simulation game** to help university students identify and respond to common phishing scenarios. The game uses **adaptive difficulty and scenario-based learning** to adjust the experience based on player performance.

SMART WILD ANIMAL DETECTION

2025

Freelance Project · Python, YOLO11n, OpenCV, Raspberry Pi 5

Developed a **real-time wild animal detection and alert system** for monitoring and identifying animals. The system integrated **Telegram notifications and a buzzer alert** to provide immediate warnings when animals are detected.

MYBARBER APPOINTMENT SYSTEM

2024

Freelance Project · Java, JSP, MySQL

Developed a **web-based barbershop appointment management system** using **MVC architecture** to organize the application structure and manage customer bookings and appointment information.

I-ATTENDANCE SYSTEM

2023

Final Year Project · Visual Studio, VB.NET, SQL Server, Power BI

Developed a **PC-based attendance system with fingerprint authentication** to record and manage student attendance using DigitalPersona biometric technology.
